

## Create an Author component

The screenshot shows the CRXDE Lite interface. On the left, a file explorer shows the project structure with 'author.html' selected. The main editor displays the HTML code for the 'author' component. Below the code, the 'Properties' tab is active, showing a table of component properties.

```
</div>
24
25 <div class="author-component">
26   <h1>${properties.authorname}</h1>
27   <p>${properties.authorbio}</p>
28   <p class="dob">${properties.dob}</p>
29 </div>
30 <div class="cmp-helloworld_item" data-sly-use.model="com.myTraining.core.models.HelloWorldModel" data-sly-test="${model.message}">
31   <p class="cmp-helloworld_item-label">Model message:</p>
32   <pre class="cmp-helloworld_item-output" data-cmp-hook-helloworld="model">${model.message}</pre>
33 </div>
34
35
```

Name	Type	Value	Protected	Mandatory	Multiple	Auto Created
1 componentGroup	String	myTraining - Content	false	false	false	false
2 jcr:created	Date	2025-03-04T08:47:43.015+05:30	true	false	false	true
3 jcr:createdBy	String	admin	true	false	false	true
4 jcr:primaryType	Name	cq:Component	true	true	false	true
5 jcr:title	String	Author Hello World Component	false	false	false	false

Author Name-single line text field ,Author Bio-multiline text field and Dob-date picker.

The screenshot shows the CRXDE Lite interface with the 'author' component preview. A 'Properties' dialog is open, showing the component's configuration. The dialog has fields for 'Author Bio', 'Author Name', and 'Date of Birth'.

Resource type is: myTraining/components  
Current page is: /content/myTraining/u

**Hello World Component Author**

**John Doe**

John Doe is an accomplished writer and passionate storyteller with over 15 years of experience in the literary world.

Model message:  
Hello World!

Resource type is: myTraining/components  
Current page is: /content/myTraining/u

Drag component

**Properties**

Author Bio \*

John Doe is an accomplished writer and passionate storyteller with over 15 years of experience in the literary world.

Author Name \*

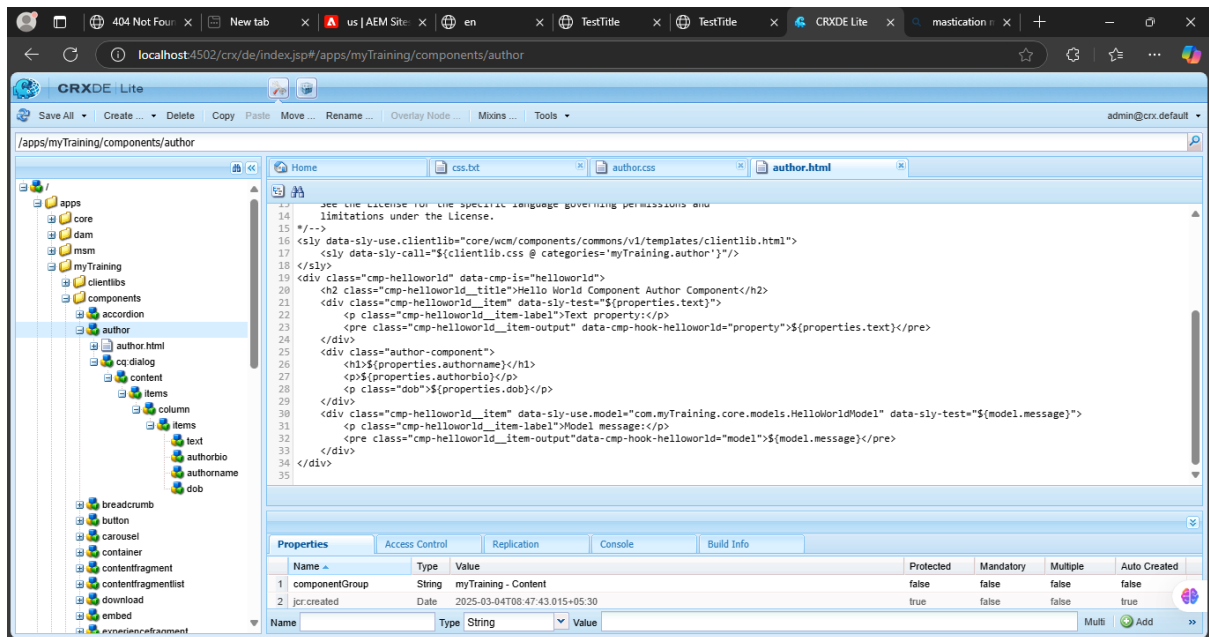

John Doe

Date of Birth \*

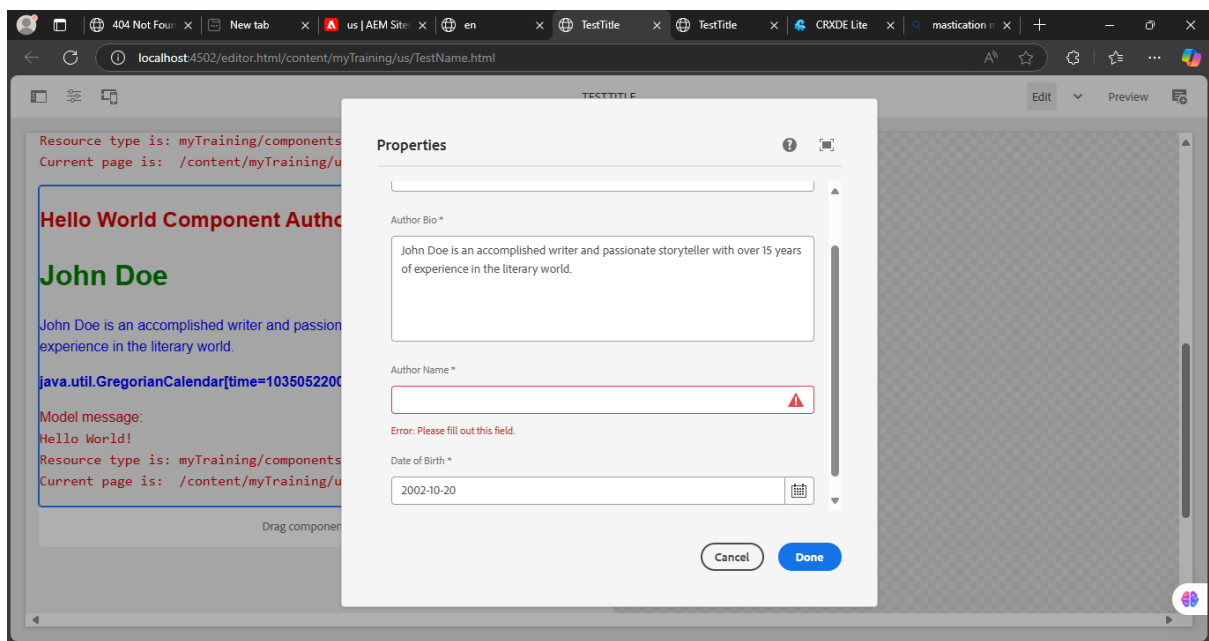

2002-10-20

Cancel Done

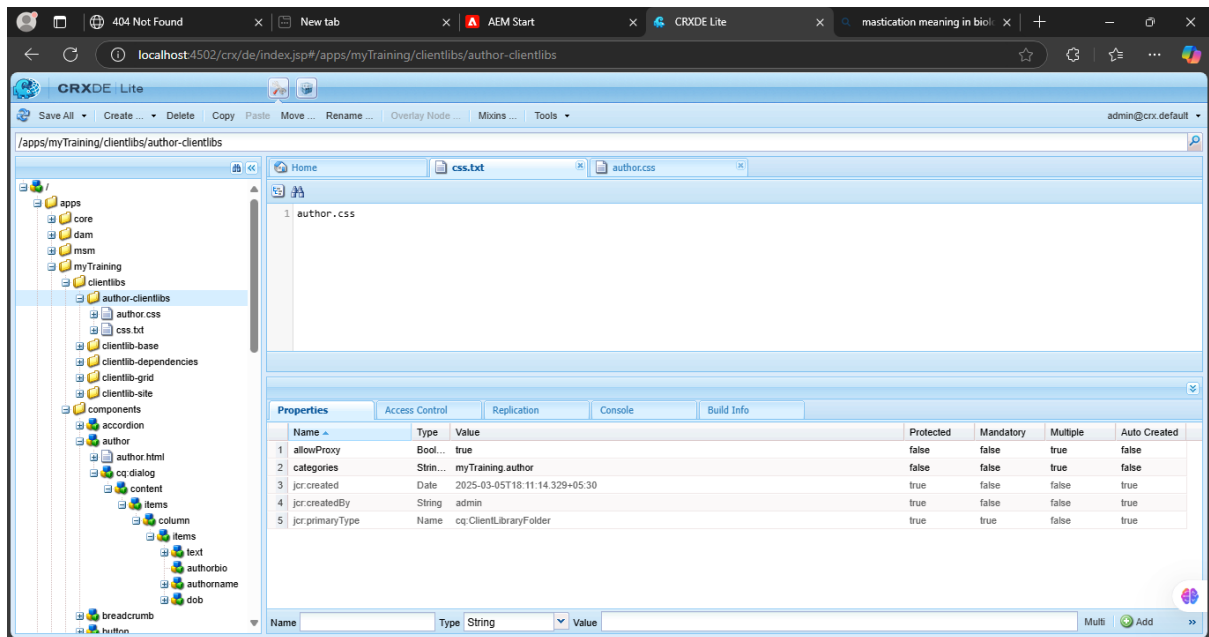

Fetch these value directly using htl properties tag

What is Dialog validation how to use them?

What is client lib?

Implement client lib make authorName h1, Make author bio normal body text and Bold the dob.
